DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 36, 37, and 53-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 36 – “its distal end” is vague as to whether it modifies the catheter or element. Claim 53 – “the distal end of the catheter” lacks antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 27, 28, 31-35, 39-42, and 51-55 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Linden et al (5,634,936). Applicant's attention is directed to the

Art Unit: 3739

embodiment disclosed in Figures 17-22 and column 2, lines 30-32 and 42-45, column 9, lines 16-20, column 11, lines 21-46, and claims 24, 26, and 32.

Claims 29, 30, 43, and 47 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Levy et al (5,387,419). Applicant's attention is directed to column 2, lines 38-47, column 3, lines 18-46, column 5, lines 46-48, and column 7, lines 3-43.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 27-55 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21, 22, 24-26, 50-57, 62-68, 74, 75, and 77 of U.S. Patent No. RE37,463. Although the conflicting claims are not identical, they are not patentably distinct from each other because they merely represent a change in scope of the claimed invention which is deemed to have been obvious to the skilled artisan.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Unger et al (5,244,460) discloses the delivery of growth factor to the heart.
